Use this guide to replace the Leica rear-facing camera in your Huawei P9.

If you are getting a "Camera failed" error message, first open Camera app from the Application manager and select "Clear data," then restart the phone. If this doesn't solve the issue, try a factory reset of the phone (be sure to back up your data beforehand). If these options still don't help, try reinstalling Android OS, otherwise you will need to replace a new back camera.

TOOLS:
